Education

BCA –Computer Application, Sri Muthukumaran Arts and Science College 2023-2026

- **CGPA:** 8.4/10

Summary

Motivated and results-driven Computer Science and Engineering undergraduate with strong hands-on experience in full-stack development and Artificial Intelligence applications. Experienced in designing and developing scalable, real-time web applications using React.js, Node.js, Express.js, and MySQL, with solid programming knowledge in Python. Demonstrated ability to integrate backend APIs with dynamic frontend components, implement real-time synchronization features, and optimize system performance for seamless user experiences.

Professional Experience

Web Development (Coin Cent): Nov 2024 – Dec 2024

- Worked on developing responsive web pages using HTML, CSS, and JavaScript, focusing on creating clean user-friendly designs.
- Contributed to enhancing the website interface by improving layout, making platform more interactive and visually consistent.
- Assisted in implementing new features which significantly improved application usability and ensured smoother performance.

Python Programming (Entry Kode) May 2025 - June 2025

- Worked on Python programming tasks to strengthen core programming concepts and improve logical problem-solving skills.
- Debugged and optimized Python code to improve application accuracy, readability, development workflows, and execution efficiency.
- Successfully completed assigned programming tasks within deadlines while demonstrating strong analytical and learning abilities.

Projects

AI-Adaptive Training Dashboard for Personalized Learning:

- Gained full-stack development experience by integrating backend API with frontend components deliver real-time functionality.
- Implemented real-time Live Class synchronization by backend data model and REST APIs that sessions scheduled by teachers.
- Replaced static frontend data with dynamic API integration using React hooks for optimistic UI updates for a seamless user.

Student Score Calculator:

- Created application that enables students to calculate and predict their academic performance based on attendance percentage.
- Implemented dynamic certificate generation and customizable templates, allowing quick document creation based on user input.
- Automated grade calculations to reduce the errors and save time for both students and faculty members during result analysis.

E-Commerce Sports Kit:

- Built e-commerce web application for purchasing sports kits with structured product listings, pricing details, secure checkout.
- Implemented order tracking and management system, allows users monitor their purchases and receive status updates real time.
- Enhanced platform responsiveness and performance optimization ensure smooth functionality across desktop and mobile device

Leaf Health Check - AI-Powered Plant Disease Detection:

- Developed an AI-powered plant disease detection application using Python, TensorFlow, Streamlit, OpenCV, and SQLite.
- Built deep learning models with EfficientNetB0 to classify plant species and detect 30+ leaf diseases with high accuracy.
- Optimized the application for fast inference, achieving disease prediction in under 2 seconds while maintaining high accuracy.

Extracurricular Activities

Event Organizer: Served as the Hospitality Team Head for one year, leading and coordinating the hospitality team during various college events and programs. Managed guest reception, participant support, and event logistics to ensure smooth execution and a positive experience for attendees.

Certifications

System Admin with IT Service Management and AI Emphasis, Fundamentals of Web Development, Foundation of Coding with Python, Generative AI – Google, English Language Communication.

Skills

Programming Languages: Python
Frameworks: Node.js, React.js, Express.js
Tools: Git GitHub, Figma, VSCODE, Render, Vercel
Testing: Manual Testing
Databases: MySQL
